

IN THE SPECIFICATION

On page 13, please replace the paragraph beginning on line 18 with the following paragraph:

At some point during the "rewinding" of the video sequence, the subscriber may, at step 522, elect to "play" the video sequence. By selecting the "play" button on the input device, the subscriber terminal sends, at step 524, a request to the session control manager 125. The session control manager 125 then requests, at step 526, the standard play stream to be sent, at step 528, to the subscriber starting at the location at which the video sequence had been "rewound", i.e., whatever frame number the subscriber was viewing at the time the play button was depressed, ~~with~~will be the starting frame number that is sent to the subscriber in the play stream. At step 530, the play stream is then demodulated, demultiplexed, and decoded such that the display in the subscriber's home transitions from rewind to play. The subscriber may then watch the program from this point forward or may request another trick play function.
